

Adjusting the AquaCure AC50 Pulse Width Modulator (PWM)

(Duty Cycle for Gas Volume and Frequency for Health)

Frequency Set Range:

Enter the settings interface when short press any button 'FREQ+' or 'FREQ-' in the normal running status to select frequency range.

Automatically switch frequency range.

Pay attention to the position where the decimal point moves when the button is pressed.

Display 'XXX'. No decimal point, The minimum frequency is 1Hz. The frequency range is 1Hz ~ 999Hz.

Display 'X.XX'. The decimal point is the penultimate,
The minimum frequency is 0.01KHz. The frequency range is 1.00KHz ~ 9.99KHz.

Display 'XX.X'. The decimal point is the third last,
The minimum frequency is 0.1KHz. The frequency range is 10.0KHz ~ 99.9KHz.

Display 'X.X.X'. The decimal point is fully lit,
The minimum frequency is 1KHz. The frequency range is 1KHz ~ 150KHz.

For example:

Display '100' means PWM output frequency is 100Hz;

Display '1.01' means PWM output frequency is 1.01KHz;

Display '54.1' means PWM output frequency is 54.1KHz;

Display '1.2.4' means PWM output frequency is 124KHz;

Using Steps:

Short or long press button 'FREQ+' or 'FREQ-' to set frequency;

1>. Set PWM frequency:

'F101':Set frequency is 101Hz.'101' can be replaced by 001~999;

'F1.05':Set frequency is 1.05KHz.'1.05' can be replaced by 1.00~9.99;

'F10.5':Set frequency is 10.5KHz.'10.5' can be replaced by 10.0~99.9;

'F1.0.5':Set frequency is 105KHz.'1.0.5' can be replaced by 1.0.0~1.5.0;

Duty Cycle Set Range

Enter the settings interface when short press any button 'DUTY+' or 'DUTY-' in the normal running status to select duty cycle. Automatically switch frequency range.

Short or long press button 'DUTY+' or 'DUTY-' to set duty cycle;

Duty cycle range is 0.00%-100%.

2>. Set PWM duty cycle:

'DXXX':Set duty cycle is XXX. 'XXX' can be 000-100.

E.g:'D051' means PWM duty cycle is set as 51%.

3>. Read set parameter:

Send 'read' and then get parameter.

4>. Return value:

Return 'DOWN':Set success.

Return 'FALL':Set fail.

The 'duty cycle' is the time during each period (pulse of FREQ) that the electricity is ON.

So during each period, if the Duty Cycle % is set for 30, the electricity is ON for 30% of the time and OFF for 70% of the time.

Since the electricity produces the gas, turning the electricity on for only 30% of the time assures that the machine is producing only 30% of the volume of gas the machine is capable of.

If the Duty Cycle is set for 100%, you get 100% of the volume the machine is capable of (50 liters per hour or 833 mL/m).

So the DUTY buttons make it REALLY EASY to vary the volume of gas produced by the AquaCure...

Now people can have the **full output of the AquaCure** for all bubbling and external applications / protocols *and then easily reduce the gas production to their safe level* for breathing, even a safe level for a child or infant.

How is the ‘frequency’ produced?

The ‘frequency’ is produced by the Pulse Width Modulator (PWM) on the front of the machine.

The pulses are DC (direct current) electrical signals to the electrolyzer, not Hz (alternating) ‘frequency’.

The frequency of the pulses is what you are setting.

432 means 432 pulses (or ‘timeframes’) to the electrolyzer, per second.

Then, of each pulse (timeframe), you are setting the Duty Cycle (0-100%)

Duty Cycle is how much time (of the pulse) the signal is turned on.

So 40% means, each pulse is turned on 40% of the time and off 60% of the time.

How do I set the frequency (FREQ) for the optimum electrolyzer efficiency?

The ‘efficiency’ of the AquaCure is pretty much ‘set’ by the design and other features than the frequency. The frequency is the least important efficiency parameter, but something people can play with if they desire. The difference in AquaCure gas production is minimal (less than 5%) no matter the frequency set with this PWM.

There is always a slight loss in efficiency when converting high voltage AC into low voltage DC, but that is universal to all power supplies and has nothing specific to do with 50 Hz or 60 Hz input.

Once the current is DC (as it is in the AquaCure), its frequency can be adjusted for the optimum efficiency of that particular electrolyzer under its specific design and operation conditions.

Setting frequency for electrolyzer efficiency involves a LOT of conditions that would take a whole book to explain, so now I’m being sorry I even mentioned it... Because a full answer would take a lot of time and it’s mostly redundant for the average user.

I included the frequency more to ‘tune’ the gas for health. There are specific frequencies (that you can find online) that assist the body to heal from various ailments. You’d choose the frequency that best helps heal the ailment you want to mitigate.

What frequency would be best for healing?

I do not know. That is not my expertise.

I am an expert in electrolysis machines and I included the CAPABILITY to impress frequencies onto the water-gas (HydrOxy) coming out of the AquaCure...

Because I know enough about frequencies to know that (if one knows what one is doing) frequencies can further enhance healing, health and rejuvenation.

So, as per the AquaCure Manual, I advise going to the actual experts to find which frequencies would work best for YOUR body and your ailment.

We set the frequency (FREQ) to 432 pps

So the power will then pulse DC electricity to the electrolyzer 432 times a second.

It is well known that imposing frequencies on water can have healthful benefits. There are frequencies that can assist healing and health. The AquaCure frequency can be varied depending on the 'energy signature' you want to impose on the gas. This is the biggest benefit of being able to change the frequency.

We set the AquaCure at 432 pps as a generally 'known' healthful frequency. There are places on the internet where you can find frequencies that help specific ailments (research Royal Rife, Hulda Clark, Solfeggio and microcurrent frequencies lists / charts).

In the meantime, I set the frequency of the AquaCure to a 'general good health' frequency of 432, as advised by several people who know far more about this than I do.

There are places on the internet where you can research frequencies that help, search:

Oscillations of hydrogen

The musical transcription of the hydrogen spectra using the law of the octave is the harmonic basis for 'hearing' in quantum physics.

The vibrations of hydrogen are shaped by pure intervals: Octave, fifth, major third, natural seventh and eleventh harmonic.

The harmonic structures of hydrogen (element No. 1) its associated frequencies and their sound structure are of special scientific interest.

Since the individual frequencies are determined by very specific types of electron transitions and their corresponding energy levels, the sound structure of hydrogen reveals quantum physics to the audience through acoustic patterns.

Over half of all atoms in the universe are hydrogen atoms. Therefore, the frequencies of hydrogen in the Universe are fundamental, since they occur more frequently than all other frequencies together."

"The quantum music of hydrogen

If we examine the spectral lines of the hydrogen, we see a number of narrowband spectral peaks (maxima), whose appearance can be described in simple mathematical series.

These series are named after their discoverers (Lyman, Balmer, Paschen, Brackett, Pfund). They represent the electron transitions within the atom and are in a sense its 'fingerprint'.

Transposed to approximately 40 octaves down, these spectral peaks are perceived by our ears as sounds.

In 1999 the Swiss mathematician and musicologist Hans Cousto calculated the complete series of octave-analogue tones of the hydrogen atoms using the formula for transposing octaves. With this work Cousto provided an important indication that even at the quantum level of atoms, the harmonic laws retain their validity.

Quantum music is a self-composing music, since the electron transitions of the atom determine which sound can be heard and when. In addition, octave-analogue frequencies are also used to modulate the sound parameters so that the sounds themselves are 'hydrogen modulated'.

In performance, the proportions of the different spectral ranges and their limits, the depths of tonal modulations as well as their transpositions are controlled live for frequency and rhythm. This creates an acoustic journey through the atomic reality, which seems familiar and strange at once.

Hydrogen is the atomic 'stem cell' of our universe. All matter and thus the world in which we live, and ultimately we ourselves, were created from hydrogen.

Meditations with the sounds of hydrogen can give an impression about what holds the world in its core together.

In general, the stepless sequence of rainbow colors [red, orange, yellow, green, blue and violet] is referred to as a continuous spectrum. If the sunlight is allowed to fall through a narrow slit-shaped aperture and the light beam leaving behind it onto a prism, it is split into a spectrum in the individual color areas. In 1802, the British physician, chemist, and physicist William Hyde Wollaston discovered dark lines on the continuous color background of the solar spectrum, looking closely at the prism-splintered beam of sunlight. The physicist and astronomer Joseph Fraunhofer described these lines in 1814 with Latin letters. Of the more than a dozen most conspicuous lines in the solar spectrum, four could later clearly be identified as absorption lines of hydrogen. Therefore, it is known that the sun is surrounded by hydrogen gas. The importance of these dark lines in the solar spectrum only became clear in 1859, when the two friendly physicists Robert Wilhelm Bunsen, the inventor of Bunsen burner, and Gustav Robert Kirchhoff determined the basics of spectral analysis in laboratory experiments.

A Tour of the Ancient Solfeggio Frequencies

Del Hungerford, D.M.A.

www.healingfrequenciesmusic.com

© 2017 Del Hungerford

Purpose of this Presentation

- Compare and contrast the ancient solfeggio frequencies with historical facts.
- Present a quick timeline of historical musical scales, tunings and temperament.
- Garner a basic understand of the overtone series.
- To learn the difference between concert pitch and temperament
- Biographical information on Horowitz and Puleo
- Compare/Contrast ancient solfeggio frequencies with Pythagorean tuning, just intonation and equal temperament.
- Tuning to the ancient solfeggio frequencies

Required Knowledge

- In order to fully understand the ancient solfeggio frequencies, one must read sheet music.
- An advanced level of music theory is a must!
- Along with theory, there must be an ability to sight sing a piece of unknown music.
- One must understand the harmonic (overtone) series and how it works in music.
- It's important to know and understand the difference between temperament and concert pitch.
- There must be a basic understanding of historical tunings and why they were used.

What's in "Internet Land"

- Many well-known contemporary musicians and other enthusiasts are agreeing with the Horowitz/Puleo theory on the ancient solfeggio frequencies.
- Various faith-based organizations are putting out videos quoting the research of Horowitz and Puleo. It's obvious by watching their videos that they lack understanding of temperament, tuning, overtones, and music theory.
- Jamie Buturff appears to be one of a few who is providing a plausible alternative.
- Very few of the articles or videos concerning these frequencies provide accurate historical musical information.
- Roel Hollander (another trained musician) is the only other accurate source that I can find. ([***www.roelhollander.eu***](http://www.roelhollander.eu))

Joseph Puleo

- In the mid-1970's Dr. Joseph Puleo, a physician and herbalist, found six electro-magnetic sound frequencies that corresponded to the syllables from the hymn to St. John the Baptist.
- According to the documentation provided in "Healing Codes for the Biological Apocalypse," Dr. Joseph Puleo was introduced, through an open vision, to the Pythagorean method of numeral reduction. Using this method, he discovered the pattern of six repeating codes in the Book of Numbers 7:12-83.

Leonard Horowitz

- A retired dentist who affirms himself as being a drug industry whistleblower and wrote the book “Healing Codes for the Biological Apocalypse” along with Joseph Puleo.
- Says that the “Solfeggio frequencies contain the six pure tonal notes which were once used to make up the ancient musical scale, until, it has been presumed, they were altered by the Catholic Church.”
- He is quoted as saying “Our modern day musical scale is slightly out of sync from the original Solfeggio frequencies and is, consequently, more dissonant as it is based upon what is termed the "Twelve-Tone Equal Temperament." In ancient times, the musical scale was called ‘Just Intonation.’”
- **My opinion:** Based on his videos, Leonard doesn’t understand musical concepts. His research on drug conspiracy is likely more accurate than his music research.

Ancient Solfeggio Notes

- 396 Hz = G
- 417 Hz = G#
- 528 Hz = C
- 639 Hz = E
- 741 Hz = F#
- 852 Hz = Ab
- (963 Hz = Bb)

Explanation of the Frequencies

- UT – 396 Hz – Liberating Guilt and Fear
- RE – 417 Hz – Undoing Situations and Facilitating Change
- MI – 528 Hz – Transformation and Miracles (DNA Repair)
- FA – 639 Hz – Connecting/Relationships
- SOL – 741 Hz – Expression/Solutions
- LA – 852 Hz – Awakening Intuition

"528 cycles per second is literally the core creative frequency of nature. It is love," proclaims renowned medical researcher Dr. Leonard G. Horowitz.

History Shows...

- Guido d'Arezzo is credited with inventing solfege around 1,000 AD to teach his students how to sight sing plainchant repertoire.
- He is also credited with inventing modern musical notation. Other than a few slight differences, we still use his method of musical notation today.
- We know that Guido used the Pythagorean scale, which is what the plainchant repertoire is based on.
- He put the poem “Hymn to St. John the Baptist” to a little tune to help his students learn the six note musical scale (much like Julie Andrews did in *The Sound of Music*).
- Guido would have written the tune on the sheet music as he heard it.
- Pythagorean temperament is very close to 12-tone ET and just intonation. The “Hymn to Saint John the Baptist” sounds nearly the same today as it did in Guido's time.

Hymn to Saint John the Baptist

Ut Queant Laxis (Hymn to St. John the Baptist)

Guido of Arezzo
(circa 991-1033)

Translation:

So that your servants may, with loosened voices, resound the wonders
of your deeds, clean the guilt from our stained lips, O Saint John.

The Problem...

- The ancient solfeggio frequencies are extremely varied in the distance between each note (temperament).
- The scale is extremely different than either Pythagorean, just, or equal temperament. Some of the intervals between notes are as small as a half step (minor second) and others are as large as a major third.
- Distance between intervals (temperament) is what creates a huge discrepancy between the Pythagorean scale and the ancient solfeggio frequency scale. The ancient solfeggio frequencies do not fit within any scale known to musical historians.
- There is no evidence of musical instruments, written music, writings of any kind, or historical artifacts that support the claims these tones are a lost scale.

Are These Frequencies a Scale?

- If the ancient solfeggio frequencies are indeed a scale and are musical frequencies, they have only been around since the middle of the 20th century.
- Composers experimented with changing everything we know about music so... if the angel was showing Joseph Puleo these frequencies in the Bible, instead of being ancient, why couldn't they be something new?
- Bible chapter and verse wasn't around until around 1450 AD – nearly 500 years AFTER Guido died. It would seem Guido needed these scriptural numbers to “set” the ancient solfeggio frequency scale.

More History

- Because Guido was a monk, he would more than likely NOT have used scales outside of Pythagorean tuning due to restrictions on how music could be written (imposed by the Catholic Church).
- As a monk, he would have utilized scales, intervals, melodies, and harmonies that were dictated by the Pope himself.
- Failure to follow “rules” could have resulted in excommunication from the church. For those who broke rules, they also got to spend a little time in jail. The ancient solfeggio frequencies break the allowable rules for scale and melody writing at the time of Guido.
- Scales of this type weren’t used until the 20th century.

Using the Solfeggio Frequencies

- Modern musical instruments are made using “equal temperament.” This will not allow a performer to easily switch between the solfeggio frequencies.
- You must re-tune for each frequency unless your instrument (usually only electronic keyboards) can also change temperaments.
- Wind and brass instruments can make small adjustments up (but not generally down) from A=440.
- The “violin family” (violin, viola, cello, string bass) can adjust to a variety of temperaments and tunings.
- Fretted instruments (guitar, banjo, etc.) can adjust tuning but not temperament unless frets are moved.

Tuning the Solfeggio Frequencies

- **396** works best at a tuning of **A=445**. It's a "G" just above middle "C." The exact frequency is 396.45. If you tune to A=444, it will be quite a bit flat. So, it's closer to A=445 than A=444.
- **417** works perfectly with a tuning of **A=442**. This is the "G-sharp" or "A-flat" just above middle "C."
- **528** works perfectly with a tuning of **A=444**. This is the "C" an octave above middle "C."
- **639** works nearly perfectly at **A=452**. It's close to an "E" on the 4th space of the treble clef.
- **741** works best with a tuning of **A=441**. It's the "F-sharp" or "G-flat" on the 5th line of the treble clef. The exact frequency is 741.67 so it will be a bit sharp.
- **852** works best at **A=451**. The exact frequency is 851.38 so it will be a wee bit sharp. It's an "A-flat" just above the treble clef.

Misconceptions About the Solfeggio Frequencies

- You CAN'T get all the solfeggio frequencies if you tune your instrument to A=432 or A=444. You must adjust for each frequency. (*See chart in previous slide*)
- There is NO credible evidence that these frequencies have anything to do with ancient tuning systems.
- Pythagorean and just intonation have been in use as long as music has been around. Musicians still tune by ear and are able to make necessary adjustments as needed.
- The world switched to 12-tone ET (late 1800's) so instruments could play in all 24 major and minor keys.
- A=440 concert pitch allowed instrumentalists to play together no matter where you lived in the world. It has nothing to do with Hitler waging war on tuning.

Final Thoughts

- If you want to be credible, don't swallow what's said on the Internet. Check the facts before you repeat the information!
- Musical intent (the intent of the performer) is very important in determining how music "feels" to the listener.
- There appears to be some evidence that musical frequencies do have healing properties.
- "Entrainment" (matching frequencies between objects) does appear to be a factor in the healing properties of frequencies.
- How the ancient solfeggio frequencies affect the listener all depends on the intent of the performer.
- Thoughts have a frequency and matter has memory. Therefore, intent can be embedded into music.
- For anything to be truly healing, it's going to require consistency. Much like taking a prescription drug, any healing protocol will require regularity.

Solfeggio scale and the additional tones

As you already know, the original Solfeggio scale has 6 tones. The tones are: 396, 417, 528, 639, 741 & 852. Following the pattern established by these original tones, additional frequencies can be calculated. There are three frequencies which can be calculated below the 396 before breaking the pattern (63, 174, 285) and there are infinite frequencies that can be calculated above the 852. See below:

- 63
- **174** – reduce pain
- **285** – influence energy fields
- **396** – turn grief into joy
- **417** – facilitate change
- **528** – transformation & miracles
- **639** – reconnecting, relationships
- **741** – expressions/solutions
- **852** – return to spiritual order
- **963** – awaken perfect state
- 1074
- 1185
- 1296
- 1317
- etc.

All these additional frequencies reduce to a 3, 6, or 9, but does it mean that we should use them just like the main tones from the Solfeggio scale? To be honest, I would recommend focusing on the 9 Solfeggio tones. The 6 main and the 3 additional tones (174, 285, 936) hold an infinite array of healing properties. They have been well researched and many people experience their benefits every day. See the testimonials.

I know that some artists utilize the additional frequencies in their work and while there is nothing wrong with doing this, it is my experience that they don't strengthen the power of the main tones. The same is about the so-called 'Master frequency' (1122Hz). Rather than trying to reinvent the wheel I would recommend applying the simplicity, beauty and harmony of the original Solfeggio scale.

The Ancient Solfeggio Scale

These Solfeggio frequencies make up the sacred Solfeggio scale:

UT – 396 Hz

Intent: **turning grief into joy, liberating guilt & fear**

This frequency liberates the energy and has beneficial effects on feelings of guilt. It cleanses the feeling of guilt, which often represents one of the basic obstacles to realization, enabling achievement of goals in the most direct way. The 'Ut' tone releases you from the feeling of guilt and fear by bringing down the defense mechanisms. 396 Hz frequency searches out hidden blockages, subconscious negative beliefs, and ideas that have led to your present situations.

RE – 417 Hz

Intent: **undoing situations and facilitating change**

The next main tone from the Solfeggio scale produces energy to bring about change. This frequency cleanses traumatic experiences and clears destructive influences of past events. When speaking of cellular processes, tone 'Re' encourages the cell and its functions in an optimal way. 417 Hz frequency puts you in touch with an inexhaustible source of energy that allows you to change your life.

MI – 528 Hz

Intent: **transformation and miracles (DNA repair)**

Tone 'Mi' is used to return human DNA to its original, perfect state. This frequency brings transformation and miracles into your life. The process of DNA reparation is followed by beneficial effects – increased amount of life energy, clarity of mind, awareness, awakened or activated creativity, ecstatic states like deep inner peace, dance and celebration. Tone 'Mi' activates your imagination, intention and intuition to operate for your highest and best purpose.

FA – 639 Hz

Intent: **re-connecting and balancing, relationships**

Another frequency from the sacred Solfeggio scale. It enables creation of harmonious community and harmonious interpersonal relationships. Tone 'Fa' can be used for dealing with relationships problems – those in family, between partners, friends or social problems. When talking about cellular processes, 639 Hz frequency can be used to encourage the cell to communicate with its environment. This ancient Solfeggio frequency enhances communication, understanding, tolerance and love.

SOL – 741 Hz

Intent: **solving problems, expressions/solutions**

It cleans the cell ("Solve polluti") from the toxins. Frequent use of 741 Hz leads to a healthier, simpler life, and also to changes in diet towards foods which are not poisoned by various kinds of toxins. Tone 'Sol' cleans the cell from different kinds of electromagnetic radiations. Another application of this sound frequency is solving problems of any nature. The fifth frequency of the Solfeggio scale will also lead you into the power of self-expression, which results in a pure and stable life.

LA – 852 Hz

Intent: **awakening intuition, returning to spiritual order**

Tone 'La' is linked to your ability to see through the illusions of your life, such as hidden agendas of people, places and things. This frequency can be used as means for opening a person up for communication with the all-embracing Spirit. It raises awareness and lets you return to spiritual order. Regarding cellular processes, 852 Hz enables the cell to transform itself into a system of higher level.

Additional research conducted by Dr. Leonard Horowitz claims to have revealed three more Solfeggio frequencies:

SI – 963 Hz

This tone awakens any system to its original, perfect state. It is connected with the Light and all-embracing Spirit, and enables direct experience, the return to Oneness. This frequency re-connects you with the Spirit, or the non-vibrational energies of the spiritual world. It will enable you to experience Oneness – our true nature.

174 Hz

The lowest of the tones appears to be a natural anaesthetic. It tends to reduce pain physically and energetically. 174 Hz frequency gives your organs a sense of security, safety and love, encouraging them to do their best.

285 Hz

This frequency helps return tissue into its original form. 285 Hz influences energy fields, sending them a message to restructure damaged organs. It also leaves your body rejuvenated and energized.

The Rife Handbook of Frequency Therapy and Holistic Health: an integrated approach for cancer and other diseases.
Updated and Expanded 5th Edition

The first softcover edition of this book, with a different title, was published in 2001 by The Center for Frequency. Two larger, revised hardcover editions, with substantially new material, an index and also different titles, were published in 2009 and 2011 by Desert Gate Productions LLC. This updated and expanded 2018 edition is published by Desert Gate Productions LLC. All rights reserved.

Introduction

Imagine what your life would be like if you could eliminate ill health in as little as one day for something mild (like the common cold), or in several months to a year, maximum, for a more serious illness (like cancer). To do this, you would need three things: a protocol to strengthen your system so that it's no longer a breeding ground for pathogens, a frequency device, and a list of frequencies to go with the device. You would not need toxic drugs or invasive surgery, you would not incur unfairly high medical bills, and you would not have to depend on doctors for long periods of time. This protocol is called Rife Therapy, named after its inventor Royal Raymond Rife.

American scientist Royal Rife, and his remarkable technology that has helped thousands overcome life-threatening diseases, is finally becoming more public after decades of suppression. As incredible as it sounds, though, the knowledge that specific frequencies destroy pathogens is not new. Royal Rife began his career as an inventor almost a century ago.

It all started with one of Rife's key inventions, a most unusual microscope. In those days, the magnifying power of existing microscopes was poor. Individual viruses, and even some bacteria, could not be seen because they were too small. Determined to view them, Rife built his highly acclaimed Universal Microscope. Many times more powerful than other magnifying instruments, the microscope made specimens visible without killing them. This feat was beyond the capacity of even an electron

microscope, which makes pathogens visible by bombarding them with electrons in a vacuum, thus destroying them.

Rife had a good reason for wanting to see specimens in their natural live state. If you want to discover how to kill a microorganism, you need to know how it reacts to its environment. Once Rife could observe the activities and responses of living microorganisms, he could devise a method to destroy them. Hence, the Rife Ray was born.

Rife's strategy of destroying microorganisms was based on the principle of resonance. Every living organism has a resonant frequency, or intrinsic radiation signature. The cliché of the soprano who shatters a glass with her single, pure, focused tone is (for now) an adequate working metaphor for how Rife's electronic device worked. The various frequencies it emitted, via an electromagnetic field, corresponded to the resonance of different pathogens and therefore disabled them. Once they were no longer viable, the body's immune cells could eliminate them.

Tests were successfully conducted on thousands of infected animals. Many of the most prestigious doctors and pathologists in the US, impressed with the initial results, supported Rife in several ways. They gave him money, worked with him in his laboratory, substantiated his findings, and used the Rife Ray in their US and overseas clinics. Some doctors even sent Rife notarized affidavits affirming the effectiveness of the treatments. Accounts of Rife's microscope and ray machine were published in newspapers, journals, and medical bulletins across the United States.

Ironically, Rife's treatments may have been too successful. The medical-pharmaceutical industry, foreseeing a massive loss in profits from drugs and surgeries, appointed some very vocal opponents—none of whom, it should be pointed out, tested the machine. The physicians and financial backers who had been Rife's colleagues and friends became targets of character assassination. Medical boards threatened to revoke the licenses of doctors who used the Rife Ray unless they relinquished their equipment. Some of Rife's closest collaborators later denied even knowing him, despite the existence of a widely circulated photograph in which they appeared with him at a banquet in his honor. Articles on Rife and his inventions began disappearing from newspaper archives. The greed and callousness of the wealthy powerful few deprived many sick people of healing and even cost them their lives. Vilified and discredited by the ignorant and greedy, his technology misunderstood and underutilized, Royal Raymond Rife died in 1971.

Rife's story, while unique in some ways, nonetheless follows a familiar pattern. First, a therapy is discovered that's non-invasive, inexpensive, and drug free. Next, after it makes large numbers of people well, its inventor, proponents and users are privately harassed, publicly humiliated, and legally persecuted. Perhaps they even die of mysterious causes or under suspicious circumstances. Finally, steeped in rumor and innuendo, the modality disappears. As with other promising complementary treatments, Rife's therapy was driven underground.

The long silence on Rife and his inventions was finally broken with Christopher Bird's article "What Has Become of the Rife Microscope?", which appeared in the March 1976 issue of *New Age Journal* and was later reprinted in other publications. Then in 1987, Barry Lynes published *The Cancer Cure That Worked*, an emotionally-charged glorification of Rife's life and work. However, original source material was scarce. Movie footage from 1936 showing Rife in his lab, and a few equally old photographs, provided the only visual clues about the equipment.

Gradually, other memorabilia surfaced: Rife's surviving lab notes, letters, telegrams, photographs and awards, all unearthed from different locations. One researcher spent hours rummaging through the morgue files of a California newspaper office to find decades-old news clippings. Another investigator spotted articles in obscure yellowing engineering journals. Still others uncovered documents in the attics and basements of people descended from Rife's colleagues and co-workers. One astonishing find was an old trunk full of reel-to-reel tapes, featuring discussions between Rife and his close colleagues. The tapes were transferred onto CDs and made available to the public.

Around 2005, a non-working Rife Ray was found in a museum and restored by a team of resourceful engineers. Shortly after, a US frequency equipment manufacturer acquired a box of priceless documents from a nurse who had once worked with Royal Rife's colleague John Marsh. This manufacturer was then given an old schematic of one of Rife's original units built in the 1930s. With the help of others—including an elderly engineer familiar with the tube technology of Rife's era—he deciphered the almost illegible drawing and reconstructed the model. Then an actual prototype of yet another model was discovered, and the Rife community was closer to understanding how Rife's technology worked. This knowledge was not merely academic. It could, and would, lead to the production of more effective modern units.

Also around this time, the most powerful of Rife's microscopes was resurrected: the Universal Microscope (after being stolen from Rife's lab decades earlier and then recovered). Kept safely in an undisclosed location, it underwent meticulous restoration by several key researchers until it was again taken. Predictably perhaps, the cloak-and-dagger antics of secrecy, theft, and duplicity that had plagued Royal Rife have continued today.

Fortunately, not everyone interested in Rife history wanted to hoard their treasures. Many documents, along with designs of Rife's original ray machine, were posted on the Internet. This global sharing has allowed Rife's diverse technologies to inspire progress in many fields of electromedicine today. Using the primary source materials as references, scientists, health practitioners, electronics engineers and curious laypeople are now experimenting with different types of machines as well as new frequencies. With a rapidly growing, fresh generation of wellness seekers demanding access to life-saving technology, a new era of frequency healing has been born.

Although frequency equipment has been substantially modified and redesigned since Rife's colleagues treated people in the 1930s, 40s and 50s, the basic principle of how the devices work—pathogen destruction through resonance—remains the same. There are now hundreds of companies, on every continent of the globe, selling frequency therapy units to address all types of diseases. Despite the intimidation tactics of the medical-pharmaceutical industry and some government agencies, more researchers are stepping forward to share what they know, via the printed page, radio, electronic media, and at conferences. In addition, medical clinics and formal and informal research centers are springing up all over the world: Australia, Mexico, Canada, the Netherlands, New Zealand, South Africa, Germany, Romania, and the United States, among other countries.

It was over 30 years ago—around 1983, long before the massive infusion of Rife-related artifacts—that I first heard about Rife’s technology. Cryptic fliers from companies specializing in unusual devices somehow found their way to me. From time to time, electronics buffs and complementary health practitioners would tell me about a device that emitted frequencies to reverse disease, but they were extremely vague in their accounts and couldn’t or wouldn’t elaborate. The couple of fliers that specifically addressed rife machines gave, for merchant contact information, addresses that were either in Mexico or for United States post office boxes, so I wasn’t sure if the sellers were honorable. Because I still had more questions than answers about the information I was seeing, I didn’t do much more than collect data.

Thus for many years, Rife and his inventions occupied the same category as all the other unsolved mysteries of the universe, like who built the Easter Island statues and how did the Bermuda Triangle sink ships. Although my collection of papers taunted me with their “too good to be true” rumors, my intuition told me that this information was vitally important and would one day bear fruit. So I put everything into a file folder and waited, remaining open to whatever the universe might choose to reveal.

Then in 1993 I met Howard, a US-based dulcimer maker and musician who had majored in electrical engineering at Cornell and was now retired. With his highly inquisitive mind, engineering background and love of tinkering with machines, Howard was an ideal Rife researcher. (He had already demonstrated an affinity for unusual science projects: One winter holiday, he sent me several Petri dishes containing glow-in-the-dark fungus as a gift.) Howard had previously been interested in frequencies as a musician (as had I), so learning about Rife was a logical next step. When he informed me that unfortunately (for experimentation purposes) he was in excellent health and therefore had no way to test his (not one, but two) frequency units, I could not believe my good fortune. Having suffered for years from a severe systemic *Candida albicans* infection and desperate for relief, I instantly volunteered to do the testing for him. Just as eagerly, Howard accepted my offer. This is how my academic query turned into a hands-on experiment.

Little did I know that my experimentation would lead me to unexpected and startling places—and continue indefinitely. I exposed myself to many different types and makes of machines and tried nearly all of the frequencies that were on the lists that came with the units.

My efforts were rewarded when the *Candida* became more manageable. Then I began helping friends and acquaintances with health problems of their own.

As people learned that I was experimenting with rife technology, they began asking me about Rife and his life, how frequencies work, and about healing in general. Not knowing all the answers—especially when they involved electronics and details about pathogens—I pumped information from every knowledgeable professional who was willing to talk to me. Dragging out my dusty medical and science textbooks, I increased my knowledge about biology, brushed up on physics, labored over chemistry, and struggled with electronics. I also read every book on Rife that I could find. The problem was, except for Barry Lynes’s indignant little paperback and one highly technical manual on how to build a frequency machine, very little information on Rife and his inventions was available. Not only that, there was no cohesive guide to understanding or using frequency equipment. Plus, information on the frequencies themselves was scattered in many different places. So I began to compile a simple guide of popular frequencies that I had personally found to be effective, while continuing to work with new frequencies.

Almost immediately, it became clear to me that I couldn’t just create a list of numbers to go with the equipment. I wanted people to understand that in most cases, it wasn’t enough to receive frequency sessions; they had to actively eliminate the conditions that had allowed their illness to occur in the first place. I needed to investigate, refine, and explain a solid, workable paradigm of what it meant to be healthy.

At that point, a major area of my life had become heavily impacted by my involvement with Rife research: my work as a Reichian (body-mind) psychotherapist. More and more clients were coming to me who were struggling not only with knotty emotional issues, but also with serious physical ailments. They had been taught that Western medicine was the only legitimate modality, so they weren’t convinced that holistic methods could help them. Some clients had trouble understanding that physical disease can influence one’s emotional state in unexpected ways. This lack of comprehension struck me as odd—considering that they had specifically sought my services because they knew that unresolved emotions lodge in the body as muscle tension, which causes biochemical changes that eventually lead to illness. But it never occurred to these same clients that many emotional problems can be exacerbated, or even directly caused, by the same biochemical imbalances and pathogens involved in disease! This piece of information even more strongly fired my resolve to focus on the physical, as well as emotional, origins of disease.

The more I became immersed in frequency therapy, sharing—with friends, acquaintances and even strangers, anyone who'd listen—became a full-time job. There was so much to report and explain that I was teaching even in social situations when I “should” have been relaxing. I did recognize, though, that this was a lot of information for people to handle—especially in a social situation, where they're not expecting to be bombarded by an impassioned lecture on medicine. Also, people tend to retain information more easily if it's written down. And, most important, although my enthusiasm never waned, my energy levels did. So I realized I needed another way to convey the material, and looked for well written, accessible books that presented the topic clearly and thoroughly.

To my great dismay, I couldn't find what I was looking for. What I wanted, very simply, was an all-purpose holistic health book that met many needs and featured a wide range of topics: cutting-edge research in medicine and science, an exposition on Rife and his work, and a foundational discussion of electromedicine (so people would understand why Rife therapy is so effective), along with a directory of frequencies to use for specific health conditions. Not surprisingly in retrospect, nothing suited my exacting requirements. After complaining for months about how hard it was to obtain reliable information about Rife, in conjunction with additional topics that I felt were essential—presented, no less, in just the way I wanted—I realized that the person who was supposed to put all this together was me. That is how my little list of popular frequencies metamorphosed into a project whose scope I couldn't possibly have foreseen. This fifth edition that you are now holding in your hands is the result of my curiosity, learning, labor and love over the course of two and a half decades.

Now that you have this *Handbook*, where do you begin? Some readers, especially those who own frequency devices, may be tempted to jump directly to the Frequency Directory (Chapter 5). But this *Handbook* is about much more than pathogen-destroying frequencies. It is about freeing yourself from medical propaganda, trusting in your own experience, and opening to the self-confidence and health that blossom when you think and act for yourself. So please don't ignore the beginning of the book. It shows you new ways to approach your body and healing, as well as addressing your questions about rife machines.

Chapter 1, “The Politics of Medicine and the Nature of Health,” is a primer on allopathic vs. holistic (also known as “complementary,” “alternative,” or “functional”)

medicine. It explains why most drugs don't work and in fact make you worse—as well as how most clinical trials are not only worthless, but can be rigged to “prove” whatever outcome the experimenter wants. The reader is also shown how drugs are approved, and by whom—which in virtually all cases, involves politics and profit rather than humanitarian concerns or even good science. This chapter also contains a brand new section on electrosmog: what it is, how it affects us, and how to avoid it.

Chapter 2, “The History of Pleomorphism and the Inventions of Royal Raymond Rife,” features Rife's unusual life and the controversial debate over pleomorphism—a phenomenon relatively unknown in the United States, but widely understood in Europe. Pleomorphism is the ability of pathogens to radically change their form, structure and function, from simple and primitive to highly complex and multi-functional, depending on the changing terrain of the body. Rife's microscope showed that often, pathogens become dangerous only when the system becomes biochemically unbalanced. So, if you are attached to the germ theory of disease, this chapter will give you a different perspective. The debate on pleomorphism is important, because as long as we perceive ourselves as helpless victims of germs, we'll continue to rely on pharmaceuticals to help us get well. But if we understand that pathogens can and do adapt to their environment, we can lessen or remove their harm, knowing that we can alter that environment—the terrain of our own bodies.

The task of making that terrain (ourselves) less hospitable to pathogens leads us to Chapter 3, “Healthy Living and Complementary Therapies.” Here, you will find some of the most effective, user-friendly, and inexpensive protocols to help you detoxify and heal. This chapter is a guide for frequency device users who want to handle the effects of sudden microbial die-off. But it's also designed for non-rifers who want clarity about lifestyle choices, and are eager to learn about some of the best, mostly self-administered, holistic protocols available today. Readers already familiar with these protocols will learn new ways to approach what they're doing. The range of therapies is vast. In addition to ozone, sauna and light therapies, Inclined Bed Therapy, and homemade colloidal silver, I have added sections on homeopathy, organ cleanses, and so-called “folk” remedies that really work—activated charcoal, clay, and castor oil. This edition also contains vital new information on food, exercise, and nutritional supplements. Also, from my Reichian psychology background, I discuss the relationship between mind and body and the psychological aspects of what we call disease.

Chapter 4 shifts our focus to the “how to” of Rife's technology. To apply this technology correctly, you need

to know who can benefit from the equipment and who should not use it, and under what circumstances; what type of frequency device might best suit your needs; how to give yourself a Rife Therapy session; how to administer sessions to children, pets and the elderly; how to select the correct frequencies; how to deal with detoxification reactions from microbial die-off; and what to do if you're not getting the results you want. If you already own a frequency device, this chapter will help you use it to its full advantage. If you don't own one, this chapter will help you choose the unit that's right for you. In addition to older material that has been rewritten for clarity, there are some new sections, including one specifically for practitioners on how to incorporate this therapy into a busy practice.

Chapter 5, offering an extensive "Frequency Directory," also teaches the reader how to navigate through the alphabetized listings that provide frequencies for common and exotic diseases. In addition to conditions such as allergies, cancer, HIV, Lyme disease, Morgellons and neurological disorders, Chapter 5 includes the viruses, bacteria, parasites, protozoa and fungi that are implicated in these symptom pictures. This chapter also doubles as a basic medical primer for the layperson; so even those without a rife machine will benefit from its contents. Summaries of the functions of organs, glands, and bodily systems accompany the listings, along with suggestions of holistic therapies that support (or can be substituted for) the frequency therapy. When medical terms are used, they are always translated into plain, everyday language.

Chapter 6, "Creating a Better World, Inside and Out," deals with topics that might be regarded as optional, but they will help us meet today's challenges. Many people are unprepared for death and they fear it, both for themselves and their loved ones. Yet paradoxically, in the United States at least, the dominant values (not to mention images) of the culture are filled with death. Our social system supports misery, poverty, fear and hate, instead of joy, abundance, truth and love. We cannot die in peace without living in love. In this chapter I discuss the changes that must be made on all levels—personal, political and transpersonal—in order for a life-based culture to emerge. In keeping with this theme, I could not resist including some exciting, groundbreaking scientific research that points to the existence of what some call "spirit" and proves beyond a doubt that love heals.

Appendix A, "Resources," lists some great sources of health-related information, products, and services (including some new listings, such as EMF protection and personal care products). For those who want to offer Rife Therapy to others, Appendix B, "Legal Implications of Rife Sessions," discusses some challenges of using a

non-medically approved device for healing purposes. (Please note that I am not an attorney. Not all countries and municipalities have the same legal requirements for providing electromedical therapies. Use this section as a guide, but do consult legal counsel to ensure that you are compliant with the laws of your locale.) Appendix C, "Healing with Electromedicine and Sound Therapies," is written for the layperson with no background in physics or electronics. This overview, which includes definitions and concepts related to the electromagnetic spectrum and sound waves, will help you better understand the more technical aspects of almost any electromedical device you wish to use.

Appendix D lists some publications on electromedicine. You may be surprised to learn that medical doctors were using many of these technologies over one hundred years ago! Appendix E describes a recent US medical study of a frequency machine to kill leukemia cells. Appendix F lists toxic chemicals in household products that many of us use every day, so you can avoid them. These chemicals are totally unnecessary because, as described in Appendix G, there are "Safe Substitutes for Common Toxic Chemicals." Appendix H shows you how to assemble your own detoxification footbath for under ten dollars (and yes, it really does work). Appendix I, compiled just before this book went to press, presents medical studies showing the harm of WiFi, microwave ovens, cell phones, computers, and other electropolluting equipment. This is a vitally important appendix, because the telecommunications industry—often with the sanction of governments, worldwide—has not only suppressed these studies (and replaced them with lies), but is now pushing the even more dangerous 5G technology. This needs to be stopped. In References, for your convenience, I include contact information for some non-mainstream sources.

Now for some editorial comments. Because a major theme of this book is self-empowerment, I have tried to select my words carefully. When referring to people with health problems, I don't use the word "patient" because it reflects and reinforces a hierarchical model that exalts the doctor as the all-knowing savior and relegates the health seeker to a subordinate, lesser role. The history of the word "layman" reveals a similar subordinate status; and even though I use "layperson" instead of the gender-biased "layman," the origin of the word should be noted. Initially, "layman" meant any person (male) who was not a member of the laity (clergy). Later, "layman" was expanded to mean anyone who was not in a specialized profession. In other words, a layman is a commoner without a title. In today's dualistic world, more respect is given to those who hold prestigious titles and degrees than to those who

do not. In truth, many laypeople are highly educated and informed—often more than those with degrees—but their lack of medical credentials apparently still makes them commoners (unworthy). I couldn’t find a suitable word in English designating someone who is not a medical professional yet is worthy of respect.

This leads me to my citing of people who don’t hold titles or degrees. While I have, of course, quoted credentialed professionals whom I admire and respect, I have also quoted people who aren’t well known or necessarily have degrees, but who offer valuable input. Considering how many medical researchers have falsified data and outright lied (explored in depth in Chapter 1), it seems fitting that we expand our notion of whose ideas are worth considering. It is my hope that common sense and a resonance with the truth, rather than degrees and titles, will prevail.

Despite my own language preferences, when quoting others I try to respect the writer’s voice. Thus, if certain words are used (such as “patient”), I leave them in. The same holds true with spellings, such as British English, which is sometimes different from American English.

Royal Rife’s name is used often, as one would expect. Appropriate to this usage, “Rife” is capitalized. However, “rife” and “rifing” are now being used as verbs (referring to the act of giving oneself a frequency session). For these, and for the noun “rifer” (which refers to one who gives oneself frequency sessions), the “r” is not capitalized. Similarly, when used to describe frequency equipment, “rife” is not capitalized, as none of the units being made today were made by Royal Rife the man. A similar logic explains why “rife practitioner” also uses a lower-case “r.” However, when referring to the research, “Rife” is capitalized because engineers and scientists involved in this area are usually investigating the man as well as the technology. I do capitalize “Rife Therapy,” however, to make this modality immediately visually recognizable and distinct from other holistic protocols being discussed.

My final editorial comment concerns the completeness of the data in this new edition. I have included current discoveries about health as much as possible. We already know that two scientists—who for years had been ridiculed by colleagues for insisting that stomach ulcers are caused by a bacterium—found *Helicobacter pylori* in the stomach lining of enough people with ulcers to win a Nobel Prize. However, dangerous microorganisms are now being linked to conditions we normally might not associate with pathogens at all. For example, one doctor found a corkscrew-shaped, bacterial spirochete in the spinal fluid of over 90% of his clients with Multiple Sclerosis. Actinomycetes is being tied to Parkinson’s

disease. And irrefutable evidence shows that not one, but two strains of Adenovirus can make us fat. In addition, we now know that bones and fat cells produce hormones.

More details on medical cover-ups have also been included in this edition, although frankly, it’s hard to keep up with them. There’s a fresh scandal every month, if not week—about not only the adverse effects of drugs, vaccines and medical devices, but also the drug industry’s attempts to hide, distort and outright falsify test results in the hope that consumers will continue to buy their products. Depending on the media spin, it’s either sloppy science (their intentions are honorable and they’re just incredibly incompetent), or outright lies (they know exactly what they’re doing and don’t care who they hurt). Every effort has been made to bring you the most up-to-date news. But unfortunately, more corruption always seems to occur (or at least becomes public knowledge). The printed page cannot match the speed at which electronic media disseminates new information. Therefore, you are encouraged to search for updates on your own.

The first edition of *The Rife Handbook* debuted at the March 2002 Rife Conference held in Las Vegas, Nevada, in the United States. Despite my having steadily been researching this technology for eight years at that time (long after I was given those first fliers about Rife’s therapy), I could not have anticipated how many people were hungry for information about this unique healing modality. Nor could I have grasped the diversity and sophistication of knowledge required to be a researcher in this field—not until I attended the conference.

Being at that conference, as a speaker, author and student, changed my life. Health professionals, equipment manufacturers, and engineers were present. But others attended too—people who knew someone with a serious disease or who were ill themselves. Tired of the same old drugs-and-surgery routine dispensed by doctors trained in nothing else, they wanted something better. Several people who were already using the technology recounted successful interventions against cancer, Lyme disease, and other conditions. I was very moved by the courage of these folks who were taking charge of their own lives—often despite the hostility of their friends and families, and against the advice of their allopathically trained doctors.

I was also impressed by the dedication and talents of the researchers. While it was true that they could be a cantankerous bunch—quarreling about their pet theories, how things worked and how to best accomplish their goals—it was largely because they cared. They

cared not only about whether others lived or died, they also cared about the quality of people's lives. As I later discovered, many of the researchers (like me) had at some point struggled with severe ill health. Others began their research after the death of a close friend or family member.

As I listened to the presentations and saw how much there was to learn, it was hard not to feel overwhelmed by what the seasoned rifiers knew. The field of Rife technology is so vast, it requires the knowledge and expertise of people in many diverse disciplines: the healing arts (medical doctor, acupuncturist, homeopath, naturopath, veterinarian, massage therapist); medical and scientific research (microscopist, laboratory technician, microbiologist); historical research (archivist, writer, filmmaker); physics; and of course electronics engineers, with their nuts-and-bolts skills of building equipment. Every rifier has something to contribute. This technology could not have come this far without input from everyone.

In the years since the first—and, in hindsight, very elementary—edition of this *Handbook* was released, I've had the almost daily privilege of connecting with customers from all over the world: Australia, Austria, Belgium, Brazil, Canada, China, Croatia, Denmark, France, Germany, Greece, Hong Kong, India, Israel, Italy, Japan, Kuwait, Manila, Mexico, the Netherlands, New Zealand, Norway, Pakistan, Poland, the Philippines, Romania, Singapore, Slovenia, South Africa, Spain, Sweden, Switzerland, Thailand, United Arab Emirates, United Kingdom, Zimbabwe, and of course my native United States. Words cannot adequately describe my appreciation of these rich multicultural exchanges. The health professionals wanted to learn more, do more. And laypeople, many of them quite ill, made a point of telling me how rigorously they had been seeking alternatives to the unhelpful medical treatments they had already tried. We may not be regularly reading or hearing about Rife's inventions in the national media, but that has not prevented knowledge of this therapy from spreading. People are waking up. They are intuitively sensing that frequency healing is a viable option, despite disparaging comments from the mainstream press. And these seekers won't stop searching until they find something that works.

Knowing how to operate frequency equipment and which frequencies to use is a good start for your health protocol. But genuine healing usually requires major changes. This is why *The Rife Handbook* contains more than the three chapters that deal with the history of Rife, the “how to” of his therapy, and the “which frequencies

should I use” advice. You are being asked to set aside a one-size-fits-all, pop-a-pill-for-instant-results mentality concerning medicine. You are also being asked to consider that your education in the sciences was at best incomplete, and at worst an outright lie. You are being asked to maintain (at least for a while) an open and inquiring mind. And you are being asked to make changes in your lifestyle if necessary. This could mean anything from different dietary habits to questioning authority or even to meditating daily. Transformation means thinking outside of the box—indeed, dismantling that box entirely! As a colleague said to me recently, “*What box?* There is no box!” The good news is, the more we extricate ourselves from old habits and rigid constraints, the more we can reinvent ourselves in increasingly life-affirming ways.

This new paradigm that I am asking you to consider does contain some familiar elements. After all, Rife's therapy—at least what he publicized—was all about viewing and devitalizing harmful microorganisms. But despite the clear association between pathogens and disease, this doesn't mean that we should ignore other issues pertaining to wellness. Healing means balancing the bodily terrain; even Rife himself stated its importance. (Hence, the need for lifestyle changes.) Also, despite Rife's spotlight on pathogens, we are realizing today that his therapy very likely conferred other benefits unrelated to pathogen destruction. The field created by his ray machine appears to have helped normalize tissue function. For many reasons, then, it's a mistake to utilize Rife's technology in an allopathic way.

Nevertheless, I do not intend to misrepresent Rife Therapy. Despite the amazing cures witnessed by Rife's colleagues, or how much I have personally benefited, or the many remarkable success stories reported by friends, colleagues and acquaintances, I freely admit that even an outstanding therapy has its limitations. There is no magic cure-all that has been found to work for everyone, always. While the majority of people respond favorably to sessions, some respond minimally or not at all. The machines cannot produce miracle cures; your body is in charge of that. If you faithfully give yourself Rife sessions but continue doing what contributed to your getting sick in the first place, the best equipment in the world will not produce lasting positive changes. Also, *when* you use a healing modality is as important as the therapy itself. Depending on the extent and type of imbalance, one protocol may work better at a given time than another.

Sometimes I hear people complain when their healing is not progressing according to schedule. But whose schedule? We are not machines, even though the medical establishment would like us to believe that we are.

Furthermore, the medical industry has a very narrow definition of “normal,” even though people vary wildly outside the range of presumed “normalcy.” How many times have you heard of someone who felt unwell, only to have their doctor say, “There’s nothing wrong with you; you’re in perfect health”? We need to rely on common sense and how we feel, not blindly trust medical biases that have no foundation in fact. Much of modern medicine is based on arbitrary standards that change, according to the desires, agendas, and goals for profit of those in power.

Here’s a question, then, that I like to ask: If medical standards keep changing (apparently capriciously), and doctors keep changing their minds about protocols and prescriptions (based on these capricious standards), whose standards should we follow? And from whom should we seek guidance? Maybe it’s time to reevaluate the health care you have been receiving. Consulting with a health professional can be helpful and even essential, but you must use your own discernment too. Who is most qualified to help you? The person with the most impressive credentials may not be your best choice. If your practitioner doesn’t listen to your concerns or take them seriously, or if his or her training seems more important than what you are experiencing, maybe you should start looking for another practitioner.

You are the one who’s living in your body—so ultimately, your best teacher is you! However, to become that exemplary teacher requires commitment. You have to study, reason, decide what to keep and what to discard, trust your own (informed) experience, and be willing to make mistakes and learn from them. And you *will* make mistakes! But let that be okay. Taking responsibility and being accountable for our own decisions and actions makes us powerful. This book is a stepping stone to acquiring the knowledge that you need to become an expert...on you.

Today, almost five decades after Rife’s death, the concepts of Rife Therapy, frequency healing and resonance therapy—while not yet household phrases (at least in the US)—are trickling more into the public’s consciousness. In some circles, the technology is being used so regularly that the word “rifting” has become a verb. I think that Royal Rife would have been moved and gratified that his modality is finally being given the respect it deserves. I trust that by the time you finish this book, you, too, will be using the word “rifting” as a verb.

One final thought. More and more people are insisting that they aren’t commodities that are bought and sold in the marketplace. They don’t want to be toyed with, experimented on, or lied to. They don’t want their

treatment options limited by what their doctors were allowed to learn in medical school. And they don’t want licensing boards to prevent their own doctors from helping them: most boards forbid doctors to suggest alternatives to the prevailing (allopathic) standard of care.

People also want their health care providers to honor their need for compassion and hope as much as they honor their need for physical care. Health seekers want to be respected, to have their humanity acknowledged—and to be free to make their own choices. In other words, people want a voice in matters that affect them—and this includes the health protocols they use. No wonder polls consistently show that three-quarters of the United States population have sought complementary therapies in addition to Western medicine!

In this technologically advanced and uncertain age, with escalating infectious diseases and degenerative conditions, we need Rife’s and similar technologies more than ever. Yet the power elite is fighting back even harder, invested in perpetuating its own agenda and maintaining the status quo—at the expense of health and happiness, not to mention lives. Despite an obvious need worldwide for all kinds of electromedical modalities, information about Rife Therapy has largely been available only to the few who discover it by chance, or who know where to look for it (and to look for it at all). The majority of people in the United States are ignorant of this elegant technology that can substantially reduce suffering and save countless lives. My goal is for *The Rife Handbook* to empower significant numbers of people—not only by providing them with reliable information about more and better health care choices, but by inspiring them to spread the word to others that these choices exist.

The widespread use of frequency therapies, including Rife’s technology, promises to change the way medicine is practiced. Even if you are fortunate to be in good health now, it’s comforting to know that this technology is available if you or a loved one need it in the future. Simply by picking up this book, you have proven that you want more than what’s being offered by industrialized pill pushers, that you aren’t satisfied with the lowest common denominator of mediocrity. Anyone who seriously investigates Rife Therapy is making a statement. Therefore, you deserve to be congratulated for having the vision and strength to see through—and beyond—the dominant paradigm. It takes courage to challenge entrenched ideas!

I sincerely thank you for helping to create this positive global change in consciousness. It is truly a blessing to be accompanied by all of you who are embarking on this amazing journey of healing and hope.

Rife Frequency List

Here you can find the biggest rife frequency database in the world. It has 10 sub-databases, including PROV, CAFL, KHZ or BIO, etc. Most people are wondering what these abbreviations mean. Here is a breakdown of what each one is:

PROV has produced consistent results in virtually all subjects it was used with.

BIO and VEGA are both excellent, based on Russian frequency research.

CAFL is the Consolidated Annotated Frequency List, amassed from the experience of Rife experimenters over years.

XTRA is a collection of sets from various sources, all chosen for their reputation for effectiveness.

CUST is your own personal database.

RIFE is a collection of Dr. Royal Raymond Rife's original frequencies.

HC is Dr. Hulda Clark's database. Use with a square wave, 100% positive Offset, and Amplitude of 9.5.

KHZ is a collection of higher frequencies. Use with a square or inverse sawtooth wave, 100% positive Offset, and Amplitude of 9.5.

ALT consists of sets based on Ayurvedic knowledge and practice, Solfeggios, and planetary frequencies.

Spooky2 not only includes all these rife frequencies. Users can also customize their own frequencies at their wish.
